### EdgeTEK™ High Performance

EdgeTEK™ edge-lit optics from Fusion Optix® are developed for use in high-performance LED lighting applications. Controlled light output distributions provide light that is ideal for linear luminaires, continuous indirect cove, wall washing, and other general illumination needs, while also allowing for new form factors and levels of integration into the lighting environment. Made in USA.

[Learn more from Fusion Optix](#)

### Design and build for any application

We design and manufacturing custom LED modules for any application and in a wide range of shapes. All of our modules have high efficiency and a long life span. They can either run on AC or DC and different voltages from other countries. We will design and build the module that best fits your needs.

## ADURA High Performance LED Modules

ADURA added several new LED modules to the standard offering for General Lighting. ADURA offers high performance Linear, Round and square shape LED modules with over 200 lm/W efficacy using low to mid power LEDs, in 2700K-6500K CCT with CRI options of 80+, 90+ and 95+. For additional info, please contact [sales@aduraled.com](mailto:sales@aduraled.com).

## See FacetCore in NYC 10/27-10/29

FlexRad FacetCore fits perfectly into radially lit fixtures down to 2 inches in diameter. Come see a demonstration at LightFair featured at LTI Optics (booth 1932) showcasing Photopia optical design software capability - accurately simulating FacetCore's exceptional radial light intensity and light uniformity.

[Learn more about FacetCore](#)

## Powered Suspension Systems

Suspend and power your Class 2 LED lighting fixtures with a thin cable, providing a clean, modern, and elegant look, without the need of a power cord. With an adjustable powered suspension cable and hardware that attaches to varied ceiling and fixture combinations, engineers can cut the cord and integrate this patented, UL recognized system into their design.

## 4 Easily Cuttable Area LED Modules

LUXTECH launches Fingerboards, making it easier than ever to fill area fixtures with architectural-grade light; combining poke-in connectors with cuttability between LEDs makes it a breeze to trim and connect boards to fill any shape fixture. Static white has optional batwing optics to minimize fixture depth. Available in White, Tunable White, RGB, & RGBW. Stocked in Philadelphia PA USA.

## UniDriver Universal Input LED Drivers

UniDriver simplifies driver selection for lighting industry OEMs and specifiers, offering True-Tri-Mode dimming (ELV, TRIAC, 0-10V; 100%–0.1%), universal input (100V–277V), Title 24 compliant flicker-free operation, and a 5-year warranty. UniDrivers are UL listed and available in many indoor and outdoor form factors from 3W-300W, constant current or constant voltage. Visit Lightfair booth 2142 for more.
