### Smart City Solutions with Sternberg Lighting

IntelliStreets® is an integrated set of solutions offering the capability to see, hear, and record what's happening on your streets, thru both cameras and audio sensors. RGBA notification provides visual cues combined with a 360 degree speaker to give pedestrians and motorists vital information in critical situations. The dynamic 2-sided digital sign provides way finding, traffic direction, advertising, event, and holiday promotion. In addition, our 'Push Blue' system creates a much higher level of threat mitigation to protect those in dangerous situations. [More Information](#)

## April 2022 NEMA Electroindustry Business Confidence Index

The situation on the ground was little changed since last month, but that left major headwinds still facing electrical manufacturers. Commenters mentioned concerns about inflation and

supply chain problems that were further exacerbated by China's lockdown of its largest city and one of its busiest ports, Shanghai, in an attempt to clamp down on rising COVID cases. The share of respondents that reported better conditions increased in April, but the proportion that noted worse conditions ticked up as well. The net effect was a modest shift from an overall "unchanged" reading of 50 in March to one of slow growth expansion at 54.2 in April. [Read the full report](#)

## 2022 LEDucation Featured Products from Light Directory

Welcome to the 3rd annual Featured LEDucation Products from Light Directory!!

Please check out some of the products that will be featured at the LEDucation show. Use the form at bottom of the page to request additional information about any of the products featured. [Click here to view the products](#)

### LTF Technology

LTF Technology's Quantum Lux™ Driver-On-Board LEDs connect directly to 120V AC line voltage and offers built-in Dim-to-Warm, an essential feature for hospitality and residential lighting. Patented LED technology provides compact light engines that are reliable, affordable choices for interior and exterior OEM lighting applications. These fully dimmable, high-

performance solid-state light emitters are optimized for uniform, evenly distributed light patterns and high-quality output. In addition to stock models, LTF's engineering team can create custom light engines optimized for your specific project requirements; low MOQ makes this a cost-effective option. Visit LTF at Lightfair, Booth 2775, June 21-23 in Las Vegas. [Website](#)

### The Underline Project

The Underline is transforming the land below Miami's Metrorail into a 10 mile linear park, urban trail, and public art destination. Pedestrian and bike pathways along the corridor connect a sprawling, auto-centric city in new ways. The linear park immediately became a destination for locals and tourists. Connecting the spaces along the half-mile of The Underline are Arne area lights from Landscape Forms design partner Urbidermis Santa & Cole. [Learn more](#)

## Restoring Darkness #41 From Prison Yards to National Parks (Part 2)

In part 2 of this podcast ([find part 1 here](#)), Michael and Tim continue their conversation. Tim gives his perspective on outdoor lighting and energy savings in Massachusetts while Michael does the same from his Ontario Canada perspective.

4", 5" and 6" Cobalt Adjustable Retrofit

Tim is the Vice President of the Massachusetts chapter of the International Dark-sky Association. [Listen to the podcast](#)

NORA®

Nora Lighting's Cobalt LED Adjustable Retrofit is now offered in 4", 5" and 6" apertures with a patented design that allows the fixture to rotate 358 degrees and adjust up to 30 degrees, while never exposing an opening or breaking the ceiling plane. A practical solution for sloped ceilings, the fixture offers 1000lm or 1200lm packages; three field changeable optics; plus optional TIR premium reflectors. A frosted lens is pre-installed and additional semi-frosted lens is included. With integral driver, Triac or ELV dimming, and seven finishes that match the entire Cobalt family of downlights. ## SPX from Lithonia Lighting

SPX™ from Lithonia Lighting® combines the latest technology and visual interest. With six different optic options, five frame colors, and easy opportunities to embed wired or wireless controls, there are countless configurations for you to find your perfect match. What makes this product with personality unique are the lens options. The 3D optics give the viewer an illusion of depth, all while the fixture itself is completely flat. SPX goes beyond visual interest; it also has low-UGR lens options that provide superior visual comfort for the occupants in the space. Now you don't have to choose between quality, performance, and visual appeal when selecting your ideal luminaire. [Website](#)

## Oversized Shades from ANP Lighting

Constructed from heavy-duty spun aluminum and available in up to 48" in diameter, ANP Lighting's Oversized Shades are designed to add maximum visual impact to retail shops, restaurants, hotels, office spaces and more. With a choice of up to 13 different shade styles in various sizes and color finishes, Oversized Shades provide a lighting solution that is as big as your vision and as bold as your brand. ## Get A Grip On Lighting - 20 Roads to Grandma's House

Webster and Ron talk to Norman Russell about finding the balance, in lighting design and integration, between the designer, the engineer and the owner. It's a challenge getting everyone into the same room. And of course, education, education, education! Mr. Russell has contributed lighting design expertise to a wide variety of public and private projects. He completed graduate studies in lighting for theatre and television and compiled a significant list of lighting design credits. [Listen to the podcast](#)

New Wireless-Enabled IOTA® Emergency Drivers for use with STAR

Wireless Connectivity

## The Cabrillo from Auroralight

This stealth lighting tool gives the designer new options when an inconspicuous light source is desired or required. Create a dramatic effect by hiding under eaves, attaching to landscape structures, or mounted in tree canopies. The Cabrillo, like our larger directional luminaires, is a specification-grade product of the highest quality. [Website](#)

IOTA® ILB AELR emergency drivers feature state-of-the-art Bluetooth® technology to deliver emergency lighting test data directly to your mobile device. ILB AELR emergency drivers automatically conduct the monthly and annual tests required by the Life Safety Code. Using the STAR (self-

## The Designer Collection from Impact Architectural Lighting

## Web-based Software for Manufacturers

Lighting Analysts is excited to announce our new web-based software for exterior lighting, Luxiflux Area. Designed for luminaire manufacturer's websites, Luxiflux Area can optimize pole spacing and mounting height to provide hard numbers for decision makers while they browse for products. With similar look and feel on mobile and desktop platforms, Luxiflux Area is the perfect website companion to our previously released Luxiflux Zonal interior software. [Website](#)

testing automated reporting) tool in the CLAIRITYTM+ app, users can view, download, and export these test results to comply with emergency lighting record-keeping requirements. The CLAIRITYTM+ app is available for free for both iOS and Android devices.

## Sabin from Delray Lighting

Control sounds that bounce off open ceilings with Sabin acoustic baffles. Easily installed over new and retrofitted Delray Dos and Uno circular fixtures, Sabin is available in four shapes and ten felt colors. They not only reduce extraneous reflected noise, but also add dramatic style to interior designs. Sabin is rated with an NRC of 0.5 and a SAA of 0.51. (Per ASTM C423-17, tested with the Mandolin model, installed in a 2 ft. Dos circle.) [Website](#)

## WST-LED Outdoor Architectural LED Wall Sconce from Lithonia Lighting

Whether you are trying to meet specification, code, or seeking a building mount solution with the right options, the WST LED is your go-to solution delivering a visually comfortable lighting experience. The WST LED

has two optics and 1,500 to 6,600 lumens, combined with a comprehensive variety of battery backup, controls, and other options to meet your specification or building code. Coupled with nLight® AIR wireless controls, the WST LED provides enhanced end-user experiences and unmatched energy savings.
